

U CHARGE SHOESE

Company has invented this research 4 years before formation. Company has made passionate based inventions including this. Basically many researchers had tried on similar invention but to make user friendly and highly effective has not come in reality yet. We Brain Chamber have proved that the research has successfully completed in all respect within 3 months involvement.

Actually work has begun on 2002 and has got completed in 2004 but involvement is 3 months. Here we understood as every research is a game of how many hours we are on with our job rather than how many days were perfectly wasted.

Some blocks are remained, will update, soon.
